

Hello!

# Put your front desk in your pocket

## You broke free from the traditional workspace

Today's business happens in the office, in the car, on location, and everywhere in between. You're mobile, and that means your business phone needs to be mobile too. After all, your next big customer could call while you're out and about, and you don't want to miss them. With Ruby, just a few taps on the cell phone you're already using lets you make and take business calls, text from your business number, and keep up with your receptionist activity wherever you may be.

**The Ruby mobile app gives you the power to customize your service and capture opportunity when it calls. Take control and get started with Ruby today!**

### Never miss an opportunity.

Every phone call is a potential sale. With one tap in the app you can see at a glance who has been trying to reach you. Catch up on messages, listen to voicemails, and return those calls from your business number without skipping a beat.

### Keep your personal number private.

Ruby provides a local number for your business so you can call and text without sharing your personal number - no need for an extra cell phone or traditional land line! Already have a business number? No problem. Our service works with existing numbers too.

### Create the perfect impression, even if you're busy.

Whether you want calls to come straight to you or to our live, stellar receptionists, the choice is yours with a quick settings update in the app. We can even pick up if you don't answer, guaranteeing your callers are greeted by a friendly voice no matter what. Ruby always has your back!

### Be flexible. Work the way you want.

When your day changes course, we do too. Easily update how you want your calls handled in real-time or sync your instructions with your device calendar. Your callers will get the exact professional, friendly experience you want, every time.

**Give us a call at 866-611-7829**

**Download the app today from the App Store or Google Play**

## Integrate Ruby into Your Daily Life

- ➔ Choose when Ruby answers - all the time, occasionally, or only if you don't pick up
- ➔ Instantly update your call-handling and routing instructions
- ➔ Make and receive calls from your business number
- ➔ Send and receive SMS texts from your business number
- ➔ View call activity records and messages
- ➔ Sync with your device contacts and Ruby can be more familiar with your callers
- ➔ Check usage data
- ➔ And so much more!
