

Information at a Glance with Ruby Voicemail Transcription

Hello!

Check voicemail and make decisions faster.

When it comes to running your business, every moment counts. A few seconds here, a minute there, they add up! With Ruby's Voicemail Transcription you'll know which voice messages are important before you listen to them, helping you focus on the things that matter most.

Your day is busy. With Ruby, you get features that help you offload some of that work so you can find the time to grow your business.

Save time and clear clutter

Voicemail Transcription means you don't have to waste time listening to solicitors or replaying messages just to catch a name or phone number. All it takes is one look to decide who to call back and which messages to delete. We'll help you keep your inbox clear and ready for whatever comes next.

Never miss an opportunity

Business doesn't stop just because you're in a meeting, having family time, or somewhere noisy. It's not always the ideal setting to listen to voicemail. Voicemail transcription keeps you in the loop even when you can't listen to the recording.

Focus on what's important

That new voicemail message could be your next big customer, and you don't want to leave them hanging. It's easy to stay focused on the most pressing matters when you can see what your calls are regarding at a glance, then return them in order of urgency.
